

# 2020-2021 Internship Placements

## Centerstone

**Outpatient Mental Health (Child/Adult) #196712** – Interns will provide psychological services mostly to an adolescent and child population (some adult clients may be on caseload). Individual, family and group therapy with clients of various diagnostic issues in a clinic-based setting. Treatment team participation and collaboration with other mental health professionals expected.

**Outpatient Mental Health (Adult/Child) #196719** – Interns will provide psychological services mostly to an outpatient adult population of those with either acute mental health issues or those with severe and persistent mental health issues (some adolescent/child clients will be on the caseload). Group facilitation in an adult day treatment program is likely.

**Hospital Generalist (Adult/Child) #196713** – Interns will provide psychological services to adults, adolescents and children in the three units of our private psychiatric hospital. Individual, group, family and consultation experiences are common with this placement. Acute mental health issues, co-occurring disorders and trauma are common diagnostic experiences in this placement.

**Trauma Services (Adult/Child) #196717** – Interns will provide trauma-focused services to adults, children and adolescents within the Rape Crisis Clinic for issues related to sexual assault, child sexual abuse, human trafficking and other traumatic life experience. Individual therapy predominates, though ongoing groups for adult survivors and non-offending parents are available.

**Integrative Substance Misuse #196714** – Interns will provide psychological services to adults with co-occurring substance misuse and mental health issues in hospital, medical psychology and primary care settings. The major rotation will work with Medication-Assisted Treatment (MAT) programming on the Centerstone Hospital campus (outpatient, residential and detox). A minor rotation will be at AllCare conducting medical psychology services and consultations in the community. Another minor rotation will involve consultation and assessment at primary care facilities and telehealth provision of care.

FYI: The above categories are the primary internship placements for the Centerstone sites. For all but the Integrative Substance Misuse placement, there will be time spent providing comprehensive psychological assessments in our Diagnostic Center.

## Jewish Family & Children's Service

**General Assessment/School Age Therapy #196721** – Major rotation is in general assessment, with a minor rotation in school-based/school-aged therapy. Interns will provide comprehensive psychological assessments to clients 4-21 years old for differential diagnosis, treatment planning, and referrals as needed. Each intern will also have a rotation in either a school-based program or a child clinic-based program providing individual and family counseling, parenting interventions, psychosocial groups, and crisis interventions. Testing referrals may include academic problems & school placement, learning disabilities/difficulties, gifted placement & intelligence testing, adoption and attachment challenges, social-emotional functioning, and behavioral difficulties.

## AllCare Medical Center

**Medical Psychology #196711** – AllCare provides primary healthcare to patients of all ages (from newborn to aging adults), with a psychological component integrated throughout the practice. Interns will provide individual and family therapy to an outpatient population of children, adolescents, adults, and geriatrics with acute mental health issues. Interns will also provide comprehensive psychological assessments those populations, to aid in diagnostic clarity and treatment planning. Also, interns will provide neuropsychological assessments to patients presenting with diverse psychological, neuropsychological, and medical conditions. Interns will be providing these services in office, skilled nursing, and hospital settings.
