## About Fellowship House Campus

Centerstone's Fellowship House Campus, located at 800 North Main Street in Anna, provides services to people who suffer with substance use disorders (SUDs) and co-occurring problems. We accept Illinois Medicaid including IlliniCare Health and Meridian.

Our treatment programs are structured to provide clients with basic tools to begin their recovery from SUD, develop the opportunity to explore their thoughts and feelings, and set personal goals.

Programs available at Centerstone's Fellowship House Campus include:

### Detoxification Program (ASAM - Level III.7)

For men and women 18 years or older, detox services provide a safe environment with professional assistance during the withdrawal of alcohol and some drugs. It also provides physical assessment, good nutrition, rest, screening for further services, and referrals.

### Inpatient Rehabilitation (ASAM - Level III.5)

For men who are 18 years or older, we provide 25 or more hours of treatment per week. Prior to receiving any of these services, a clinical is done to determine the patient's needs, and a case manager is assigned to each patient. The case manager provides individual counseling, assigns groups, case management, assists with referrals, and follows the treatment plan throughout the patient's treatment.

### Outpatient Program (ASAM Level - I)

Provides treatment services ranging from 1 to 9 hours group and/or individual counseling per week. Provides treatment services for persons participating in Medication Assisted Treatment (MAT). Case management and referrals are provided as appropriate.

### Family Program

Provides alcohol and drug education, communication skills, introduction to Al-Anon, co-dependency, and other relevant information for family/significant others affected by the person with the substance use disorder.

### Youth Outpatient

Qualified professional staff provide outpatient counseling for adolescents 12-17 involved with substance use and youth struggling with the substance use of another person. Services include assessment, case management, referral, education, individual counseling, and family counseling if appropriate.

### Aftercare

We provide detailed after care planning so that your recovery is ongoing. After care services include the development of a support network, individual and family education, group counseling, and adjustment to a substance-free lifestyle.

## About Centerstone

Centerstone is a not-for-profit health system providing mental health and substance use disorder treatments. Services are available nationally through the operation of outpatient clinics, residential programs, the use of telehealth and an inpatient hospital. Centerstone also features specialized programs for the military community, therapeutic foster care, children's services and employee assistance programs. Centerstone's Research Institute provides guidance through research and technology, leveraging the best practices for use in all our communities. Centerstone's Foundation secures philanthropic resources to support the work and mission of delivering care that changes people's lives.
