

Internship Particulars

This is a paid doctoral internship with an anticipated stipend of \$18,075.

For 2020-2021, all Centerstone interns will have access to medical insurance, dental insurance, vision insurance and life insurance, as well as paid days off.

Internships begin on July 6, 2020, and run for 52 weeks; a 40-hour work week is encouraged.

There will be three concurrent rotations for this internship. Through these three rotations, interns should be exposed to a broad range of experience consistent with becoming a clinical psychologist or neuropsychologist with forensic experience.

An APPIC site since 2005.

Psychology Doctoral Internship Rotations

Psychological and Neurobehavioral Services is a large outpatient practice providing mental health services to Polk County and the surrounding areas. Services provided include neuropsychological assessment, psychological assessment, forensic assessment, cognitive rehabilitation and therapy.

Each internship will include one major rotation and two minor rotations – one in assessment and one in therapy. These rotations are concurrent throughout the year.

Forensic/Neuropsychology Rotation (Major/Minor):

This rotation includes all the features of the Neuropsychology Major Rotation. In addition, the intern may provide forensic assessments to juveniles and adults to assess competence to proceed, sanity at time of offense, ability to waive Miranda rights and mitigation.

General Assessment Rotation (Major/Minor):

The intern will provide comprehensive psychological assessment to children, adolescents and adults for diagnostic clarity and treatment planning. Assessments may include referrals from psychiatrists, therapists, other medical professionals, attorneys or community agencies. Conditions for assessment may include depression, anxiety, bipolar disorder, personality disorders, autism spectrum disorders, attention deficit hyperactivity disorder, learning disorders and other behavioral disorders. The intern will also provide adult and juvenile forensic evaluations.

Neuropsychology Rotation (Major):

The intern will provide neuropsychological assessment to children, adolescents, adults and geriatrics presenting with psychological, neuropsychological and medical conditions. Adult conditions include traumatic brain injury, stroke, seizure disorder, depression, anxiety and other mood/affective conditions. Childhood conditions include traumatic brain injury, autism spectrum disorders, attention deficit hyperactivity disorder, learning disorders depression, anxiety and other mood/behavioral disorders. The intern will provide cognitive rehabilitation services to remediate cognitive deficits and protect against future decline.

Didactics and Supervision

Didactics

Centerstone Consortium offers over 100 hours of didactic training in a variety of areas. Major training topics include: neurological issues in child assessment, co-occurring disorders, trauma-informed practice, integration with other disciplines/primary care and professional development as a psychologist.

Each year, the training interests of the interns are taken into account in providing specialty clinical training. Per the request of our interns, online trainings have also been incorporated into our curriculum. However, formal, didactic face-to-face contact for interns also occurs regularly.

Supervision

Supervision is always provided by a licensed psychologist associated with that rotation.

For 2020-2021, Dr. Tracey G. Henley, Psy.D., and Dr. Suzanne Lavelle, Psy.D., will be providing the supervision for the internship.

Centerstone uses the Online APPIC Application Materials. In addition, this location requires an integrative psychological assessment.

Completed packets for 2020-2021 must be submitted no later than November 1, 2019. Incomplete packets will not be reviewed.

Prospective interns will be contacted to arrange for interviews.
