Medication Assisted Treatment

202 Bentley, Marion

The Medication Assisted Treatment Philosophy

Recovery is the personal and unique way that a person changes attitudes, feelings, goals, skills or roles to overcome addiction and live a hopeful, productive life. Medication Assisted Treatment (MAT) alone is not enough to overcome addiction – individual and group counseling and therapy are vital to overcoming addiction.

About Medication Assisted Treatment:

Medication Assisted Treatment is an essential part of comprehensive treatment for substance misuse. Our MAT facility, located at 202 Bentley in Marion, is state-of-the-art and has a unique approach to help begin your journey towards successful recovery.

FDA-approved medications are used to calm overly-active areas of the brain, reduce cravings and increase your chances of long-term recovery. Options include Vivitrol, Suboxone and Methadone. We will listen to your concerns and, with your individual needs in mind, we will help choose the medication option that is right for you.

Centerstone MAT is here to support you and your family on your journey to long-term recovery. We understand that it can be extremely stressful to begin this process, therefore, our MAT staff will help reduce your anxiety and provide you a safe and comfortable detox. Our goal is to help you cope and begin enjoying your life.

For more information, call toll-free 1-855-608-3560 or visit centerstone.org.

These services are funded in full or in part through an Opioid-State Targeted Response (STR) Grant (TI080231) to the Illinois Department of Human Services, Division of Substance Use Prevention and Recovery, from the U.S. Department of Health and Human Services, Substance Abuse and Mental Health Services Administration.
